

# Stacking and Blending Ensembles:

Voting ensemble.

|  |     |     |           |
|--|-----|-----|-----------|
|  |     | 3.5 |           |
|  | LR  |     |           |
|  | DT  | 4.1 |           |
|  | KNN | 2.7 |           |
|  |     |     | mean(3.7) |

cypa iq package  
7 71 3.5

: In stacking: ~~the~~ outputs 3.5, 4.1, 2.7 will be the input in stacking and 3.5 will be ~~the~~ output and do again.

• Problem: Overfitting: [100 working base model & meta model both in same data]

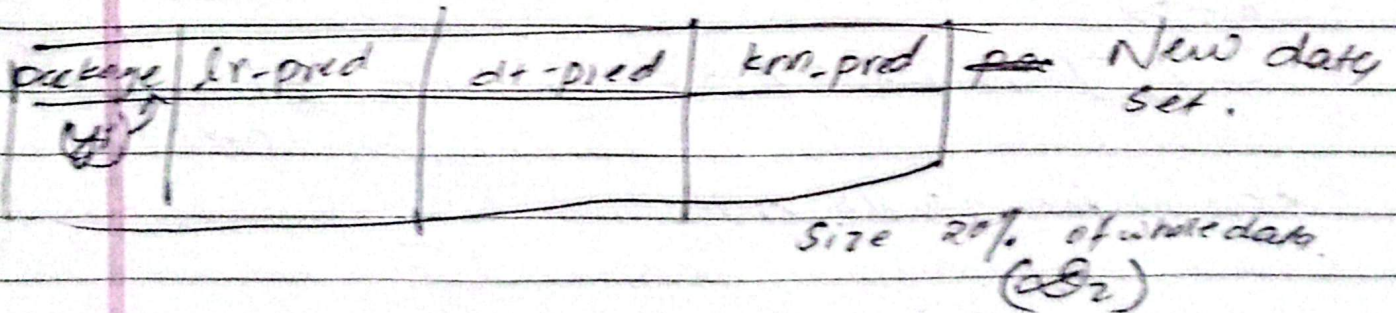

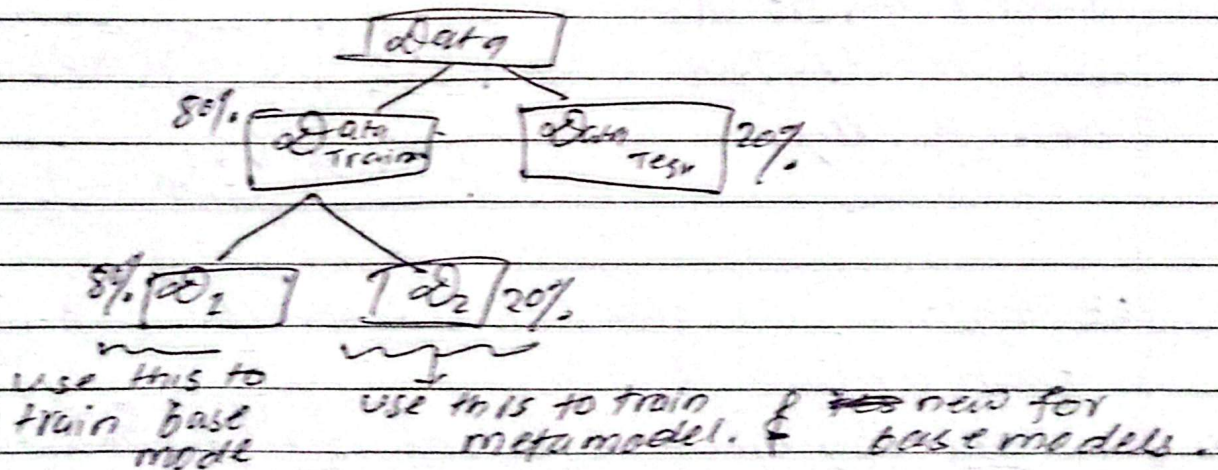

(Blending)

(Stacking)

- Solution: Holdout method & K-fold method.

## + Hold Out Approach - Blending

[For testing  $\text{Data}_{\text{train}}$  & calc  $R^2$  score.]
